

We invite you to develop & implement
new business solutions for sustainable
packaging and alternatives to single-use
plastic in Egypt!

Join the 18th process and co-create business
solutions:

Dates for Ideation Sprint: **06 – 09 March 2023**

Venue **Egypt (Red Sea)**

Incubation: **3 Months of technical support**

Application deadline:
03 February 2023

[Apply now!](#)

Why did you receive this invitation? What is it about?

You have been selected: In each lab of tomorrow program companies are selected based on their expertise and product portfolio.

Participating in this program will allow you to

- **increase your product portfolio and revenue**
- expand your market and increase their network
- (co-) develop new products with other companies from the EU and Egypt
- while strengthening your business you **create real impact for Egypts packaging industry and the environment**
- benefit from the lab of tomorrow services like our strong network of partners from politics, academia and civil society (selection below)

Welcome to the lab of tomorrow

Your opportunity to
increase your business
&
to create impact

On the services the lab of tomorrow
offers and the unique opportunities it
provides, please see the following slides

About the lab of tomorrow

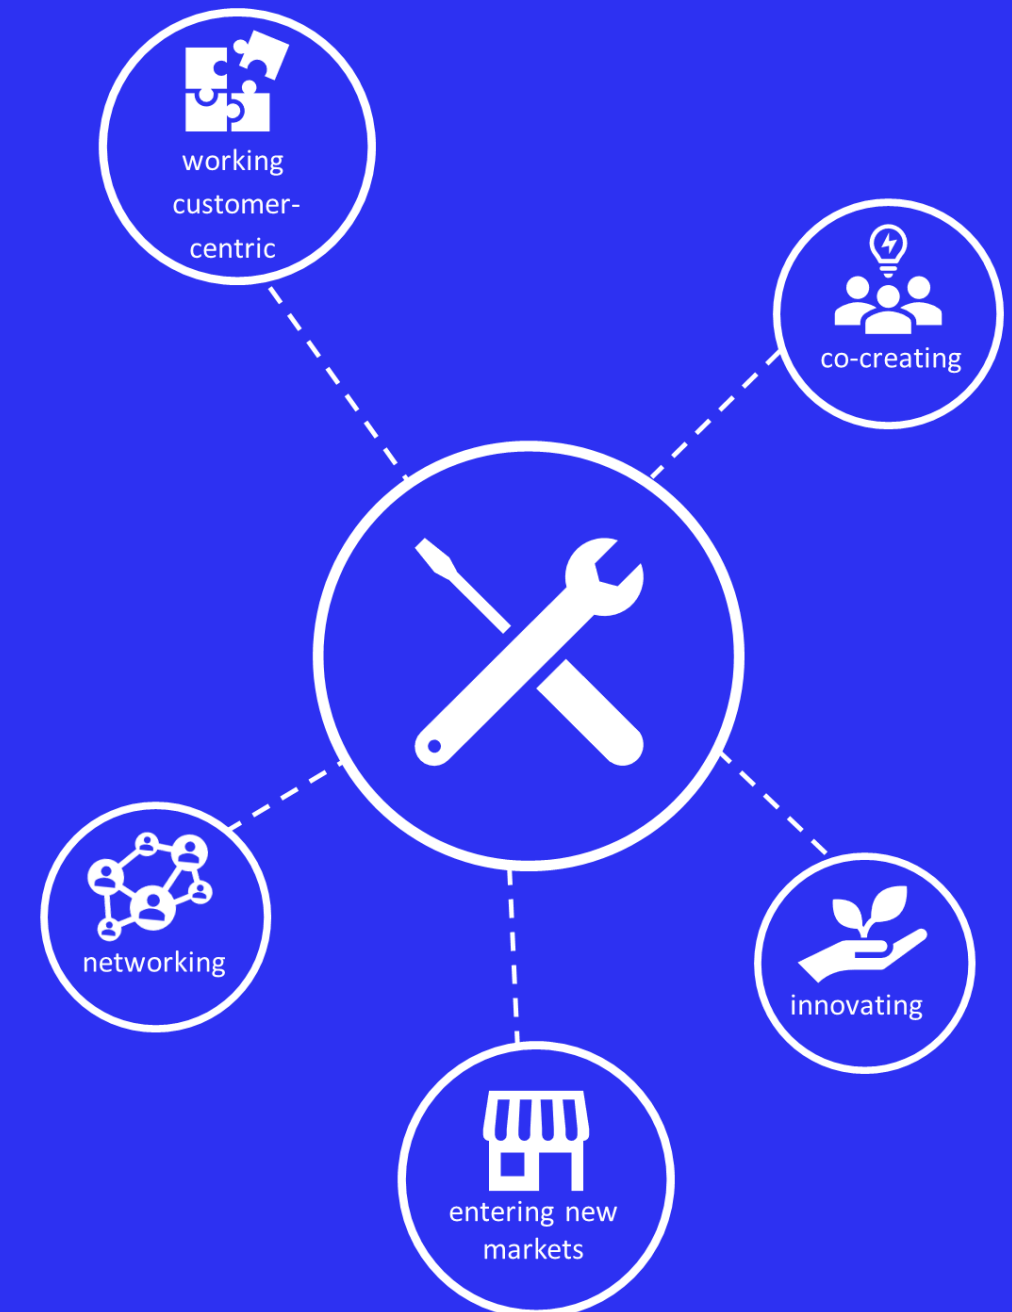

The lab of tomorrow (lot) is **your chance to expand** your market, product portfolio and revenue. At the same time, it is **your opportunity to help** address critical development challenges with the products and services you create.

Each lab of tomorrow process offers its participants a well-defined business & impact opportunity, a strong product-development process, supported by expert coaches and a strong supporting network from academia, politics and the start-up ecosystem, e. g. investors. Throughout the process you will work in teams with other companies. Together, you have everything it takes to co-create solutions that can be brought to market successfully and relatively quickly. To create impact – for you and for the local people in Egypt.

“
Business is a very
beautiful mechanism to
solve problems, but we
never use it for that
purpose. We only use it
to make money. It
satisfies our selfish
interest but not our
collective interest.

Muhammad Yunus
”

Tap into the business opportunity

The challenge and its opportunities

Each lab of tomorrow takes on a main challenge and identifies **business opportunities** within. You are supported to develop **matching products for these business opportunities**, helping to overcome the challenge while simultaneously accessing new markets and growing your business and networks.

In lot18 we tackle the following challenge:

LOT 18 – Egypt

How can we foster new business opportunities for innovative, sustainable packaging solutions and single-use plastic alternatives for the food, retail & hospitality sectors in Egypt?

About the challenge

Be part of the solution

Egypt is the largest plastic polluter in the Arab world. High costs for sustainable packaging combined with low consumer awareness lead to huge landfill waste and inability to open new markets either locally or abroad. The lot 18 seeks to address these challenges and find low-threshold and scalable solutions to produce sustainable packaging at low cost and make it available on the market.

We would therefore like to invite you to participate in our 18th lot program...

AND

Create business by solving problems

- Promote sustainable business models for alternative packing solutions
- New markets for start-ups to contribute to the industrial ecosystem
- Rising demand from food processing manufacturers for sustainable packaging
- Entry into European and international markets by abiding to the packaging regulations

“

Strengthen the
Egyptian ecosystem of
sustainable packaging
by opening local and
international business
opportunities

”

Business Opportunities

The aim of the process is to address these opportunities through profitable products. In this program we support your product development efforts with a profound set of information and analyses on the customer group and need, with partners and ideation and incubation services.

When applying, please select the business opportunity, you would want to address. Typically each company can only participate in one of the sub-challenges-teams.

Increasing export through affordable sustainable packaging

How might we provide sustainable packaging solutions at affordable costs that comply with the requirements of global export markets, enabling Egyptian food processing & fresh foods companies to increase exports to different markets?

Packaging alternatives for retail and hospitality sectors

How might we enable the Egyptian retail and hospitality sectors to acquire alternatives to single-use plastic products (cups, plates, cutlery, plastic bags, etc.) in a context where a sustainable business model provides a competitive advantage (e.g. environmental awareness of end-customers)?

Sustainable packaging material for food processing firms

How might we enable Egyptian food processing firms and the retail sector to get access to more cost-effective and locally produced sustainable packaging material in a context where local sustainable packaging options are currently unaffordable and/or insufficiently available?

Resource efficiency of sustainable packaging solutions

How might we design / produce new sustainable packaging solutions that use less raw materials and increase resource efficiency in a context where natural/ordinary resources are scarce and should be reduced to cut on costs?

Participant journey

- Innovation teams are formed
- Match-making of business partners
- Translation of creative workshop results into business life
- Coaching and consultancy on teambuilding, funding opportunities and financing

Application deadline:
03 Feb 2023

Teambuilding and
onboarding session:
19 Feb 2023

Start of Incubation
Phase I (4-8 weeks):
19 March 2023

End of the
lab of tomorrow

Decision on the
application:
12 Feb 2023

Ideation Sprint
5-day business development
program:
06 to 09 March 2023 in Red Sea
Gov, Egypt

Innovation teams can
independently
develop products and
bring them to market

Ideation Phase

Incubation Phase

Who we're looking for!

Why did we choose you?

- **You are strongly interested in addressing the Egyptian** market by developing and implementing a new business solution with SDG impact.
- **You have an entrepreneurial spirit**, the drive to tackle environment related challenges and are ready to drive the development and implementation of the emerging solution.
- **You have relevant products or services in your portfolio** that might be adapted to become part of new business solutions or relevant resources for business solutions.
- **You have a background** in business development and operations, product development & innovation, or a related field.
- **You can commit time and resources** to the development and implementation of your emerging solution in the market.
- **You can participate in a venture team in** all 5 days of the Ideation Sprint to co-create a new solution together with other entrepreneurially-minded experts from the region.

Long term requirement

- You should be able to **fully commit to developing the business model** post the ideation sprint.
- “You are right for the lot”.
